

# VIEWPOINT: THE POWER OF ONE

Viewpoint™ is an all-in-one e-Discovery platform that covers the core components of the electronic discovery lifecycle, including Collection, Early Case Assessment, Processing, Analysis, Review and Production. By completely integrating all of these tools into one product, Viewpoint delivers:

- A single product, not cobbled-together series of disparate applications
- All features and analytics available to all users throughout the project
- Increased productivity, since there is no need to import, export or copy files between tools
- Improved defensibility with a single document repository
- Seamless production in any format
- One fixed cost for all e-discovery needs: no cost of analytics, no licensing fees, unlimited number of users
- Single day installment
- Simple and quick to upgrade
- More simplicity and less training
- More security, since all data can stay behind the firm's firewall at all times
- Faster performance means more efficiency from attorneys and review teams

## WHAT CLIENTS ARE SAYING ABOUT VIEWPOINT REVIEW

*The functionality built into Viewpoint provides us with an array of tools that we can draw upon to develop the most cost-effective and defensible approaches to document discovery for our clients.*

– Derek Krabill, E-Discovery Manager, Kramer Levin Naftalis & Frankel LLP

*It's like comparing a Masarati to a Ford F150.*

– Current Contract Reviewer

*While some vendors claim weeks or months to process cases from collection to review, Viewpoint e-Discovery gets the job done in a matter of days. The implementation of Viewpoint helped eliminate a dozen or so interspersed, costly software platforms and added new capabilities for legal and support teams.... We're always under pressure to get results to our attorneys and clients. Compared to our previous e-Discovery solutions, Viewpoint allows us to process information three to five times faster.... In the long run, Viewpoint may end up saving our clients millions of dollars.*

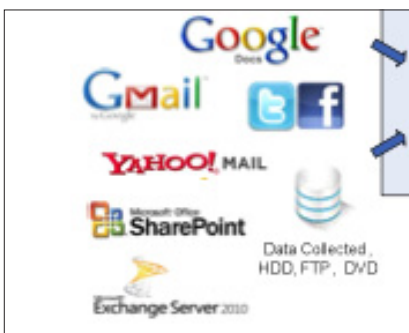

– Brad Bonnington, Practices Support Manager, Fenwick & West LLP

# VIEWPOINT ALL-IN-ONE E-DISCOVERY PLATFORM

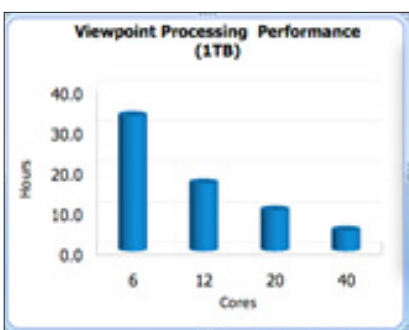

Viewpoint™ is a state-of-the-art e-Discovery Platform. All modules are fully integrated and each step is “a right-click away” to get data to the next level. Viewpoint includes the following key features:

## COLLECTION

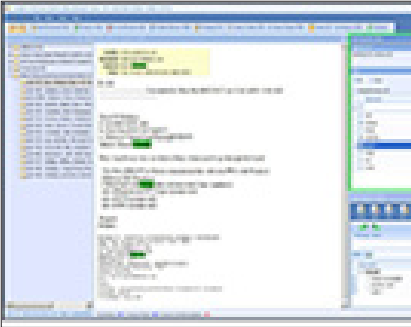

- Implemented within own network infrastructure
- Point-and-click interface
- Filter through a variety of parameters
- Forensic copy preserved directly into Viewpoint
- Viewpoint Connectors import authorized data from Facebook, Gmail, Twitter, SharePoint and other cloud-based applications

## PROCESSING

- Early Filtering
- Systematic De-Duplication
- Multi-Language Support
- Evidence Repository
- Pre-Processing

## REVIEW

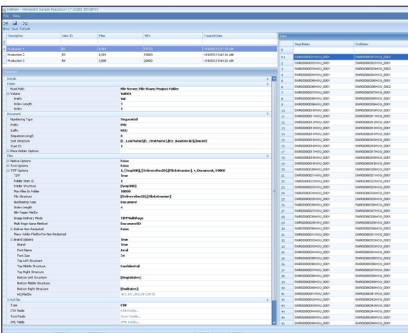

- Simple, Outlook-Style Interface
- Customizable Screen Layout
- Search Preview
- Multiple Integrated Viewers, including Native, Near-Native, TIFF, Text and HTML
- Inline Redaction
- Persistent Keyword Filtering and Hit-Highlighting

## EARLY CASE ASSESSMENT AND ADVANCED ANALYTICS

- Technology Assisted Review
- Visual Index – search and view data in the index, prior to search
- Near Duplicate Identification and Review – locate all “similar” documents and view them side by side
- E-mail Thread Analysis – remove redundant iterations of a thread while defensibly tagging, reviewing and producing any or all
- E-mail Relationship Analysis – see who’s talking to whom, establish communication patterns, track individual or network domains involved in e-mail traffic
- Concept Analysis – identify all concepts within a collection to organize for review and enhance keyword analysis

## PRODUCTION

- Native and TIFF Production
- Categorized Production Folders
- Rolling Production
- Production Security

All the features you need for efficient, cost-effective and defensible discovery...that's the power of one.
